

## Discover...

Many international students decide every year to enroll in some programmes offered in medical sciences in Serbia, either in English or Serbian. The reason for this great interest in studying medicine and related sciences in Serbia could lie in the fact that medical researchers and practitioners from Serbia are highly valued nationally and internationally. Even though the quality of medical education in Serbia is top-notch, tuition fees are still comparatively lower than in other European countries.

### ...Medical sciences

in Serbia are usually offered as integrated programmes lasting for 6 years (5 years in dentistry and pharmaceutical studies), during which students are encouraged to explore their interests and perspectives and decide whether they want to become general practitioners, medical specialists or researchers in the field of medical sciences.

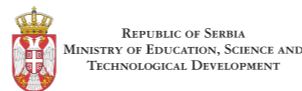

### StudyInSerbia.rs

- Find programmes in the field of medical sciences offered in Serbia.

## Experience...

...how is it to study medical sciences in Serbia.

### University of Belgrade

The **Faculty of Medicine** celebrated its 100th anniversary in 2020. It is the leading institution for medical education in Serbia, as well as a significant player in regional terms. The faculty is a home institution for 40% of Serbian medical students and runs over 60% of biomedical research projects. Individual student exchanges are a common practice and the Faculty is providing final-year students with excellent tutorship options at the Clinical Center of Serbia and other affiliated hospitals. Students come not only from neighbouring and European countries but also New Zealand, China, Egypt and others.

The mission of the **Faculty of Pharmacy** is to educate and train experts competent for all aspects of medicines and work in clinical laboratories, as well as for providing services in all fields of pharmaceutical practice. Students acquire knowledge and skills necessary for active participation in manufacturing, distribution and marketing of medicines, promotion of health, prevention and treatment of diseases, as well as for laboratory work and applying laboratory analyses for diagnosis, monitoring and prognosis of diseases. In addition to being a higher education institution, the Faculty of Pharmacy in Belgrade is also involved in various educational, scientific, healthcare, professional, publishing, librarian and museum activities.

### University of Niš

**Faculty of Medicine** is a higher education institution that achieves its mission through:

- Innovation, development, and transfer of knowledge through education and research;
- Preparing students to apply their knowledge and skills in practice and be able to improve continually;
- Improving the health of the general population by closely cooperating with the regional health centres, top healthcare institutions, and other academic, economic, and social institutions in Serbia and abroad.

### University of Novi Sad

Since its foundation in 1960, over 9000 medical doctors, dentists, pharmacists, nurses and therapists have graduated from the **Faculty of Medicine**. The graduates of this institution come from all over the world: Greece, Switzerland, Sweden, France, United Kingdom, Germany, Hungary, United States, Canada, India, Iran, Kuwait, Malaysia and China, etc. The teaching base of the Faculty of Medicine Novi Sad includes the departments and institutes of the Clinical Centre of Vojvodina. The Faculty organizes yearly trips to different European countries and exchange programs, which help students to share their ideas with colleagues from other universities and implement new techniques at their home institutions. Students may be included in research activities according to their wishes and interests. Also, students are very actively included in various extracurricular activities and sections.

## Learn...

...how to prepare for studies in medical sciences.

Most higher education institutions in Serbia offering programmes in the field of medical sciences also offer online preparatory courses for prospective students. For more information on course programmes, schedules and fees, please visit the website of the institution you are interested in. If you need help to contact the institution, you can write to: [studyinserbia@tempus.ac.rs](mailto:studyinserbia@tempus.ac.rs).

### Good to know:

Most medical programmes include a mandatory internship period at clinics or public health institutions. These internships are usually organized during the last semester of studies and last for 6 months.
